ENVIRONMENTAL ALLERGEN PANEL

Patient: Marcus D. Whitfield **DOB:** 03/03/2016 **Age:** 9

Date: 07/2025 **Ordering:** Anita Sharma, MD

Panel: Standard environmental allergen IgE panel (trees, grasses, weeds, molds, dust mite, cat, dog, cockroach).

Results: ALL NEGATIVE

No specific IgE elevation to any tested environmental allergen. Allergen-specific IgE levels all below 0.35 kU/L (Class 0). Total IgE: 42 IU/mL (within normal limits for age).

Interpretation: Negative environmental allergen panel does not exclude non-allergic asthma triggers (viral, exercise, irritant, cold air).

Clinical management of asthma should not change based on this result.
