

FOSTER PARENT DAILY LOG

Caregiver: Ms. Renee Carter | Patient: Marcus D. Whitfield | Period: 02/10/2026 through 03/17/2026

02/10/2026

First day in my home. Marcus is quiet, does not make eye contact. Gave him his medicines from the bag: Risperdal, Concerta, clonidine, iron pill, montelukast, inhaler, melatonin. He took them without issue. Did not eat dinner. Refused bath.

02/12/2026

Marcus ate cereal for breakfast. Refused lunch. Took all meds. I noticed he chews on a small painted wooden toy he brought from his last home. Tried to take it away and he had a meltdown lasting 45 min.

02/15/2026

Social worker visited today. Marcus still not talking much. Snoring very loud at night. Sometimes sounds like he stops breathing for a few seconds then gasps. Mentioned this to social worker.

02/20/2026

PT eval today. Marcus walked on his toes the whole time in the clinic. Therapist said he needs braces for his ankles. He was cooperative.

02/26/2026

Marcus started wheezing last night. Gave nebulizer at home, no improvement. Took him to the ER this morning. They put him on a breathing tube. He is in the ICU. I am scared.

03/02/2026

Marcus discharged from hospital today. They gave him new medicines and a list. His inhaler changed to a stronger one. They restarted his montelukast and his iron pill. He seems tired but OK.

03/05/2026

Marcus snoring very loud again tonight. Took him for blood work today. He screamed during the draw — had to hold him down. He chewed on that wooden toy the whole car ride.

03/08/2026

Marcus had a good day at school per his teacher. Ate most of his dinner. Still snoring at night every single night. I can hear him from my bedroom.

03/10/2026

Bad day. Marcus threw a chair at school. Teacher called me. He was screaming and crying when I picked him up. Hitting himself in the head in the car. This is new — he has not done this before with me.

03/12/2026

Another bad day. Marcus bit another student at school. Called the DCFS worker. He is getting worse not better. He is angry all the time now. He was not like this the first 2 weeks.

03/14/2026

Took Marcus to the dentist today. First time he has ever been to a dentist apparently. He has cavities. He was scared but the dentist was nice. Still having outbursts at home.

03/15/2026

Meltdown after school again. He was pulling his hair and rocking. I called the psychiatrist office but they said the next appointment is not until March. Gave all his medicines tonight.

03/17/2026

Marcus was up 4 times during the night. Snoring, then quiet, then gasping. He does this every night. His teacher says he falls asleep in class almost every day. Tomorrow is his intake visit at the new clinic. I am bringing all his pill bottles and everything I have.
