

FOSTER PARENT MEDICATION AND HEALTH INTAKE FORM

Child's Name: Marcus D. Whitfield DOB: 03/03/2016

Placement Date: 02/04/2026 Form Completed: 02/10/2026

Foster Parent: Ms. Renee Carter Phone: (312) 555-0184

Address: 1847 S. Hamlin Ave., Chicago, IL 60623

MEDICATIONS I AM GIVING MARCUS (from pill bottles and prior foster worker list)

1. Risperdal (risperidone) — 1 tablet at bedtime (bottle says 1 mg)
2. Concerta — 1 capsule in the morning (bottle says 27 mg)
3. Iron pill — 1 tablet with food
4. Inhaler (Symbicort) — 2 puffs morning and night
5. Albuterol inhaler — when he is wheezing
6. Melatonin — 1 gummy at bedtime (3 mg, I bought this at the store)
7. Fish oil — 1 capsule with food (prior foster worker said to give this)
8. Miralax — 1 cap full in juice daily

MEDICATIONS NOT ON THIS LIST THAT MIGHT EXIST

The prior foster worker mentioned something about a medicine for his mood that was stopped, but I don't know the name. There might be other medicines I don't know about. I only have what was in the bag they gave me when Marcus came to my house.

HEALTH CONCERNS

- He snores very loud every night. Sometimes he stops breathing.
- He chews on a painted wooden toy all the time. I cannot get him to stop.
- He does not eat much. He is very thin.
- He has a lot of spots on his body (brown flat spots).
- He walks on his toes.
- He has been to the hospital for breathing problems before.
- I do not know who his doctors are. The DCFS worker gave me some papers but they are confusing.

ALLERGIES

None that I know of.
