Phone: (312) 555-4620 | Fax: (312) 555-4629

January 25, 2026

PATIENT: Marcus D. Whitfield **DOB:** 03/03/2016 **MRN:** PED-2025-04471

Re: Clinical Hold — Infliximab

To Whom It May Concern:

Marcus D. Whitfield is followed in pediatric gastroenterology for suspected inflammatory bowel disease, with Crohn's disease not yet confirmed histologically.

Based on review of recent laboratory studies drawn around 01/20/2026, I am placing infliximab on hold at this time due to elevated liver enzymes. Recent liver function testing showed ALT 92 and AST 78. In light of these abnormalities, further infliximab infusions should not be administered until hepatic function has been reassessed and the etiology of the transaminase elevation has been investigated.

The infusion center has been notified. The next scheduled infusion has been cancelled pending further evaluation. Please do not reschedule infliximab infusions without clearance from this office.

The patient's primary care provider and infusion center pharmacy have been notified of this hold. No bridge therapy has been initiated at this time. The patient should continue current oral medications as prescribed and follow up with our office for reassessment.

Sincerely,

Raj Patel, MD
