

COOK COUNTY HEALTH LABORATORY SERVICES

1969 W. Ogden Ave., Chicago, IL 60612 | (312) 555-3400

Patient:	WHITFIELD, MARCUS D.	Ordering Provider:	Outpatient — Cook County Pediatrics
DOB:	03/03/2016 (Age 10)	Collection Date:	03/05/2026 10:30 AM
MRN:	PED-2025-04471	Received:	03/05/2026 10:48 AM
Sex:	Male	Reported:	03/07/2026 09:15 AM
Insurance:	Medicaid — DCFS Foster Care (IL)	Specimen:	Venous blood (lithium heparin)

QUANTIFERON-TB GOLD PLUS

Component	Result	Interpretation	Units
Nil (Negative Control)	0.08		IU/mL
TB1 Antigen	0.18		IU/mL
TB2 Antigen	0.12		IU/mL
Mitogen (Positive Control)	0.42	Low	IU/mL

OVERALL RESULT: INDETERMINATE

Laboratory Comment: Indeterminate result due to low mitogen response (positive control < 0.50 IU/mL). An indeterminate result does not rule out Mycobacterium tuberculosis infection. Possible causes include immunosuppression, improper sample handling, or insufficient lymphocyte response. Clinical correlation and repeat testing recommended.

Methodology: QuantiFERON-TB Gold Plus (QFT-Plus) — ELISA, Qiagen.

Cutoff: TB antigen minus Nil >= 0.35 IU/mL = Positive. Mitogen minus Nil >= 0.50 IU/mL required for valid negative.
