

D19 — MICU Transfer-Out Note

Dr. E. Park, MICU Fellow | MICU | 02/25/2026 15:00

Patient: Pemberton, Harold J. **MRN:** 847-29-3156 **DOB:** 04/12/1951 **Allergies:** Sulfa drugs (rash)

MICU TRANSFER-OUT NOTE

Patient: Harold J. Pemberton | MRN: 847-29-3156

Date: 02/25/2026 15:00 | Provider: Dr. E. Park, MICU Fellow

Destination: Medicine Floor, 7-West

ICU SUMMARY:

Mr. Pemberton was transferred to the MICU on 02/22 for hemodynamic monitoring following recurrent upper GI hemorrhage requiring IR embolization of the left gastric artery. ICU course notable for:

- Brief norepinephrine requirement (< 10 hours)
- Total 4 units pRBCs transfused
- AKI (Cr peak 2.3, now 1.9) – pre-renal from hemorrhagic shock
- Hyperkalemia (K+ peak 5.2) – resolved
- Carvedilol reduced to 12.5 mg BID during ICU stay for hypotension
- Multiple medications held (furosemide, lisinopril, spironolactone, glipizide, allopurinol, apixaban, metformin)
- See cardiology and nephrology reconsult notes from today for medication restart guidance (NOTE: their recommendations differ regarding lisinopril and spironolactone – defer to medicine attending)

CONDITION ON TRANSFER: Stable. Off pressors x 72 hours. Tolerating regular diet. Hgb stable 8.5. No re-bleeding.

MEDICATIONS ON TRANSFER:

1. Carvedilol 25 mg PO BID
2. Amlodipine 5 mg PO daily
3. Pantoprazole 40 mg PO BID
4. Prednisone 30 mg PO daily (taper)
5. Nebulized albuterol 2.5 mg Q4H
6. Nebulized ipratropium 0.5 mg Q6H
7. Insulin sliding scale (lispro) QAC/QHS
8. Atorvastatin 40 mg PO daily
9. Levothyroxine 75 mcg PO daily
10. Tamsulosin 0.4 mg PO daily
11. Docusate 100 mg PO BID
12. Senna 8.6 mg PO QHS
13. Polyethylene glycol 17 g PO daily

14. Acetaminophen 500 mg PO Q6H PRN

15. Vitamin D3 2000 IU PO daily

16. KCl 20 mEq PO daily

HELD MEDICATIONS: Apixaban, lisinopril, furosemide, spironolactone, metformin, glipizide, allopurinol, ibuprofen
