Patient: Caduceus, Opus J. MRN: 004-7703 DOB: 14 Mar 1956 Allergies: NKDA

OFFICE VISIT NOTE

Patient: Opus J. Caduceus | MRN: 004-7703

Date: 06/12/2012 | Provider: P.A. Kim, MD

Visit Type: Established Patient / Follow-Up

Practice: Oak Harbor Family Medicine (TRICARE), Oak Harbor WA

CHIEF COMPLAINT: Multi-problem follow-up. Sleep study results review. New urinary and sexual

HISTORY OF PRESENT ILLNESS:

56-year-old active duty USN returning for multi-problem management. Sleep study was ordered after referral from cardiology for fatigue and snoring complaints reported during A-fib workup. Results now available. Patient also reports new urinary symptoms over the past 6 months: nocturia 2-3 times nightly, weak urinary stream, hesitancy. Separately reports difficulty achieving and maintaining erection x several months, described as distressing. No new chest symptoms. Tolerating metoprolol.

CURRENT MEDICATIONS:

- Omeprazole 40 mg PO daily
- Metoprolol succinate 25 mg PO daily
- Naproxen 500 mg PO BID PRN
- Flunisolide nasal spray PRN

PHYSICAL EXAMINATION:

Vitals: HR 72 | BP 136/84 | Wt 89 kg

General: NAD.

HEENT: Mallampati III. Mild oropharyngeal crowding. Boggy nasal mucosa.

CV: Rate-controlled, regular. No murmurs.

Lungs: Clear bilaterally.

GU: DRE - prostate enlarged, smooth, non-tender. No nodules.

ASSESSMENT & PLAN:

1. Obstructive Sleep Apnea - newly diagnosed. Sleep study (04 Apr 2012, Olympic Sleep Center, Silverdale WA): AHI 28, moderate-severe OSA. CPAP 10 cmH2O initiated. Sleep medicine follow-up arranged.
2. Urinary symptoms / suspected BPH - nocturia 2-3/night, weak stream, hesitancy x 6 months. DRE consistent with BPH. PSA ordered. Urology referral placed to Dr. C. Tran, Olympic Urology, Bremerton WA.
3. Erectile dysfunction - difficulty achieving and maintaining erection x several months. Discussed openly with patient. Urology referral above will address; will request urological workup for organic etiology.
4. Atrial fibrillation - per cardiology (Dr. Mensah, 20 Mar 2012): rate-controlled on metoprolol. Rivaroxaban 20 mg PO daily added per cardiology recommendation. Echocardiogram ordered.
5. GERD - breakthrough symptoms persisting on PPI. GI follow-up pending with Dr. Abara.

Labs/Orders: PSA, CMP, lipid panel, HbA1c

Follow-up: Urology and sleep medicine. PCP RTC 3 months.
